zipFormMLS-Connect®

Import MLS data directly into your transaction.

zipFormMLS-Connect® integrates data straight from an MLS system into a zipForm® transaction. This eliminates the need for double data entry for many fields in a transaction. zipFormMLS-Connect® is available with select MLS systems throughout the country.

zipForm®'s electronic forms software already saves you time and helps reduce data-entry errors by allowing data to be entered once and used across all documents associated with a transaction. Now, with zipFormMLS-Connect®, users can import data that is stored electronically in an MLS database, but has not been keyed into zipForm®.

zipForm® is Real Estate Transaction Standard (RETS) compliant and supports data import from other RETS-compliant applications. This allows zipFormMLS-Connect® to receive data from MLS providers.

zipFormMLS-Connect® offers MLS providers a means of easily adding increased functionality to their service by giving users of zipForm®, the industry's leading electronic forms software, the ability to import data directly from an MLS database.

zipLogix™'s family of tech-savvy products has become the recognized industry standard for electronic real estate forms and is currently used by more real estate professionals than any other real estate software program. zipLogix™, the creator of zipForm®, is a REALTOR® Benefits partner.

MLS's are able to partner with zipLogix™ in a couple different ways. They are able to fully license the service and provide it to their members as a member benefit. An MLS may also partner with zipLogix™ allowing members to purchase zipFormMLS-Connect® for a small yearly license fee.
